- **Academic Achievement:** Highest National Exam score in the department

EXPERIENCE

Trusmi Group | Cirebon, West Java
IT Officer (February 2024 – Present)

- **As a Software Engineer**, I developing innovative platforms aligned with business objectives. I excel in problem analysis, system design, and testing of up to **3 new** IT programs monthly. Through collaboration with the IT Manager, I deliver strategic solutions that enhance operational effectiveness while maintaining system agility through systematic documentation and regular maintenance procedures.
- **As a Research and Development Specialist**, I spearhead technology research initiatives, with particular focus on AI and automation technologies for strategic implementation. Utilizing design thinking methodology, I identify problems and develop solutions with a **70%** implementation success rate for method-based approaches. I present weekly findings in an executive-friendly format, enabling informed decision-making and driving technology adoption across the organization.

Complete Selular | Cirebon, West Java
Application Developer (July 2022-May 2024)

- Leading the development of an **asset management platform** reduced employee workload by up to **80%** through streamlined processes and intuitive interfaces. I successfully developed 4 web applications and 3 mobile applications following SDLC methodology with comprehensive documentation. My focus on translating complex business challenges into **practical technology solutions** enhanced operational efficiency and empowered teams with productivity-boosting tools for improved decision-making.

Director's Secretary (April 2022 – July 2022)

- Efficiency and accuracy defined my approach to managing proposals, official documents, and correspondence using MS Office and cloud platforms. I ensured seamless information access while maintaining proper version control and data security protocols. My coordination of the Director's schedule, high-level meetings, and comprehensive administrative support facilitated informed decision-making and smooth executive operations through meticulous minute-taking and organizational skills.

NOKO FARM | South Kalimantan

Business Development (August 2023 – December 2023)

- Strategic brand development increased company awareness by **40%** through innovative technology integration and compelling digital presence. I conducted sales data analysis and consumer interest assessments that strategically boosted company income by **30%** while optimizing resource allocation. Leading a **12**-person team, I coordinated research initiatives, product innovation, and targeted market strategies that maximized business impact through data-driven decision-making.
